START OF QUIZ Student ID: 60226669, Mohammad, Waquas

Topic: Lecture 7 Source: Lecture 7

How might we make Eliza more robust (don't just say that you would have her use Chat-GPT's API). (1)

Topic: Lecture 7 Source: Lecture 7

Describe at least one piece of grounding in real life (outside the examples given in class). (1)

Topic: Lecture 6 Source: Lecture 6

Provide a reasonable logical representation of the question "Who starred in Casablanca?" (1)

Topic: Lecture 5 Source: Lecture 5

Briefly describe a "factoid-based" question, and one way that a QA system might answer it.

Topic: Lecture 6 Source: Lecture 6

What tools are necessary to extract an RDF triple from a question? Provide at least 2, and briefly explain. (1)

Topic: Lecture 8 Source: Lecture 8

Imagine that we have a dialogue system trained with reinforcement learning. What part of a dialogue might result in a negative reward (ie, a penalty) to the system's policy algorithm? (2)

Topic: Lecture 5 Source: Lecture 5

Describe the two ways that we can construct \mathbf{Q}/\mathbf{A} databases, and how they differ. (2)

Topic: Lecture 8 Source: Lecture 8

We waited until the last week of classes to talk about policy-making systems (like the one in ChatGPT), but several other systems you've looked at over the program could be considered to have a policy algorithm in place. Briefly describe one, and how you view it as a decision policy. (2)

Topic: Long

Source: Lecture 5

Imagine that we are using a Q/A system for movie recommendation (by asking questions like "What is a good movie like Shawshank Redemption?"). Bert is likely not going to be sufficient to answer this question. Describe how you could modify the Bert Q/A reader to find good answers. (3)
